Leak Guard™ Fill Valve
Lowe's Item # 222271

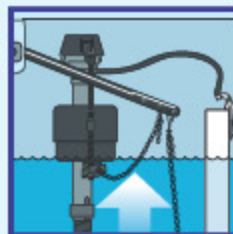

LEAK GUARD™

Leak Guard™ is an ideal product for use in multi-housing, hotel and rental applications.

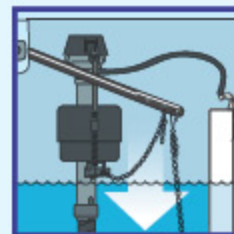

How Does Leak Guard™ Work?

When a leak starts to drain the toilet tank, a unique patented "locking" action prevents the float cup from dropping.

This requires the user to press the tank lever twice. The first time unlocks Leak Guard™ and refills the tank.

The second time initiates the flush. Even when Leak Guard™ "locks" the valve before refill, the toilet remains fully operational.

Lowe's carries a full line of Leak Guard™ kits.
